

Vitale Smoothies individuell gestalten

Website Feedback - Everything but configurator (latecomer)

BERLIN, 22.08.2023

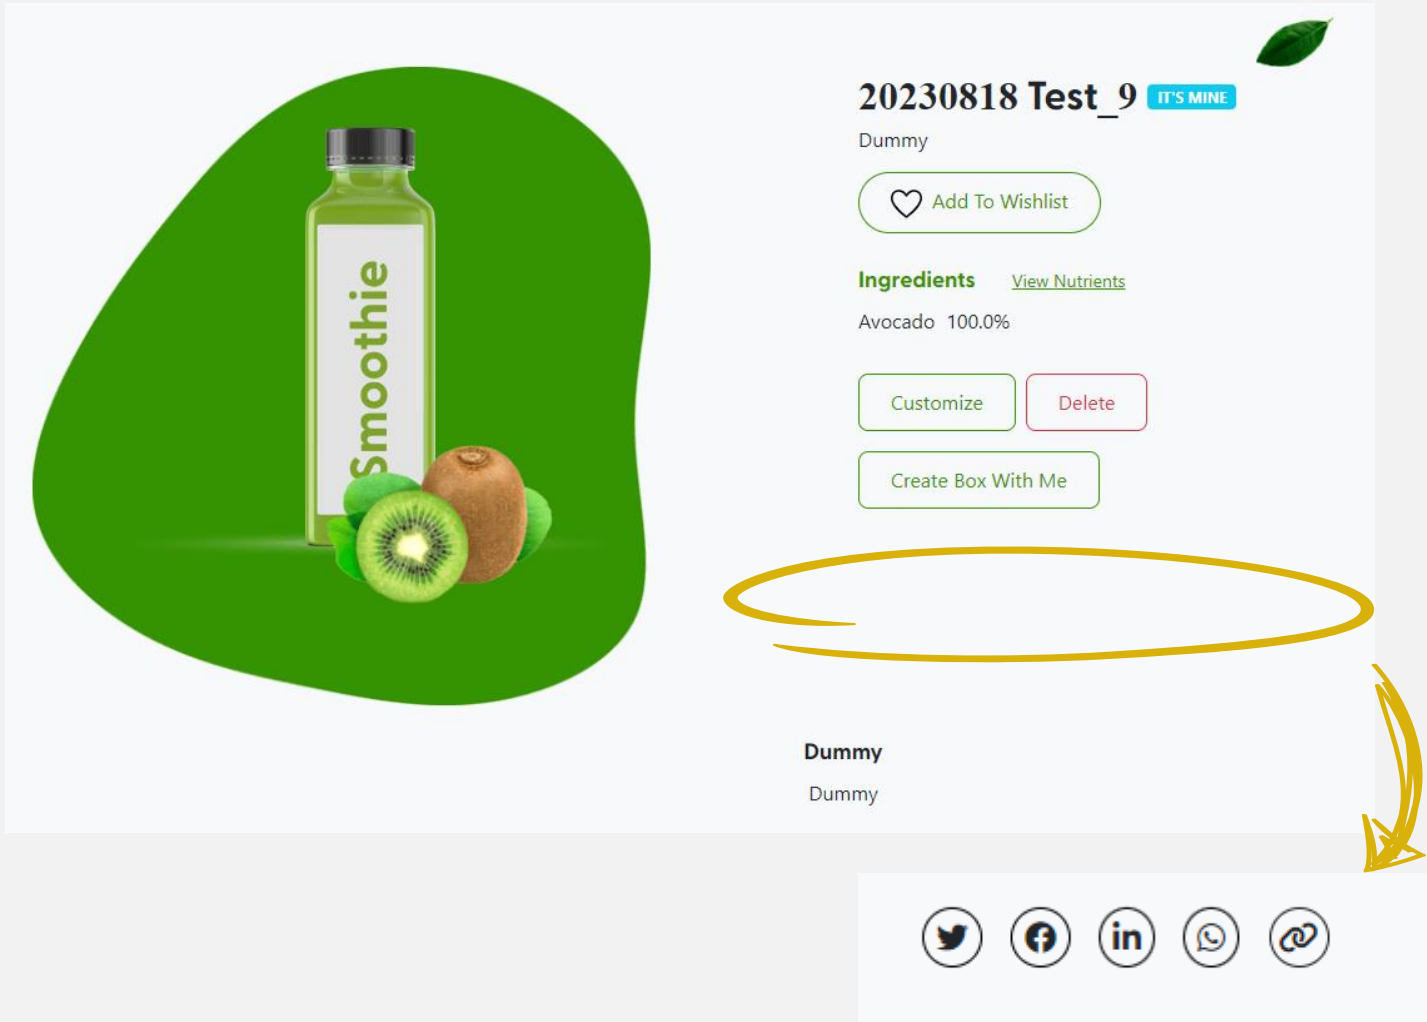

Recipes (latecomer) | 1/2

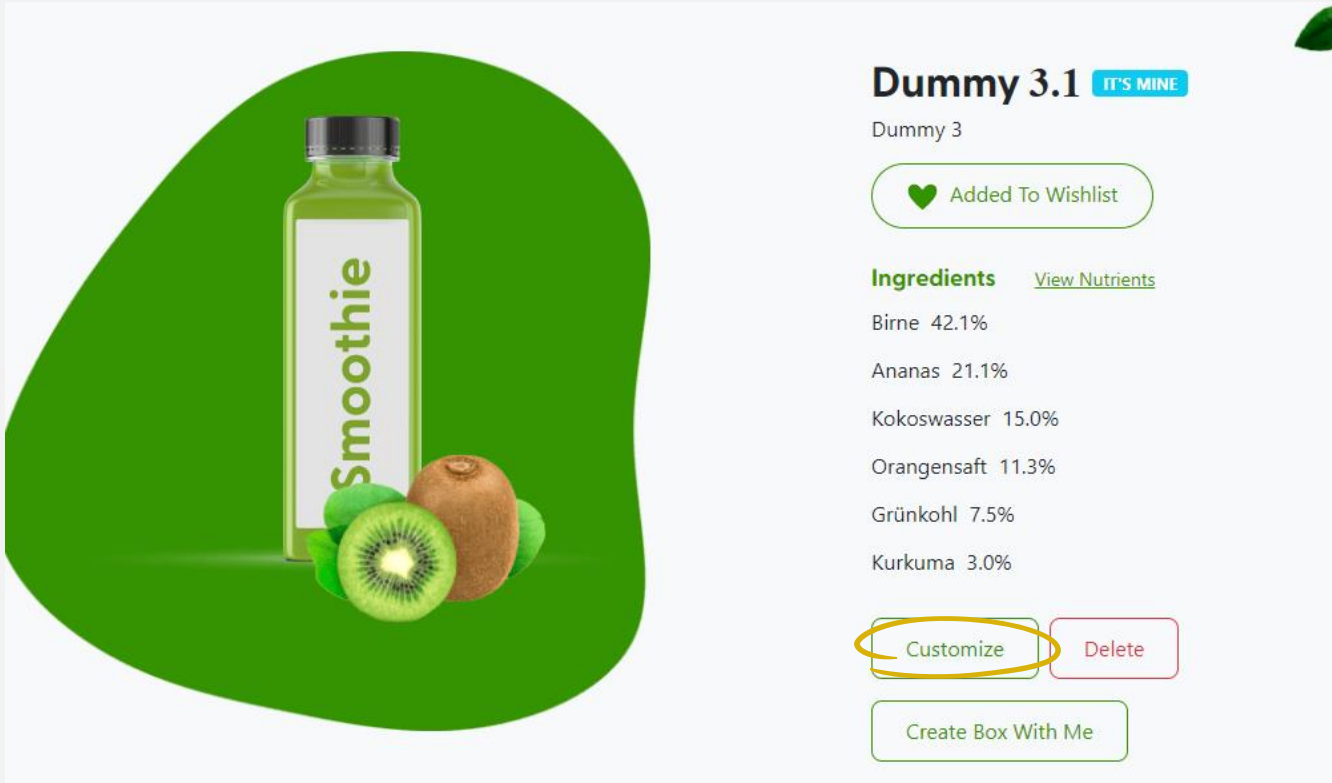

Custom Smoothies are not Visible to others,
so, Sharing doesn't make any Sence.

ToDo

1. Please add: We need the sharing option also for individual smoothies.
 - The link sharing is already implemented for standard smoothie recipes and for smoothie boxes (custom and standard)

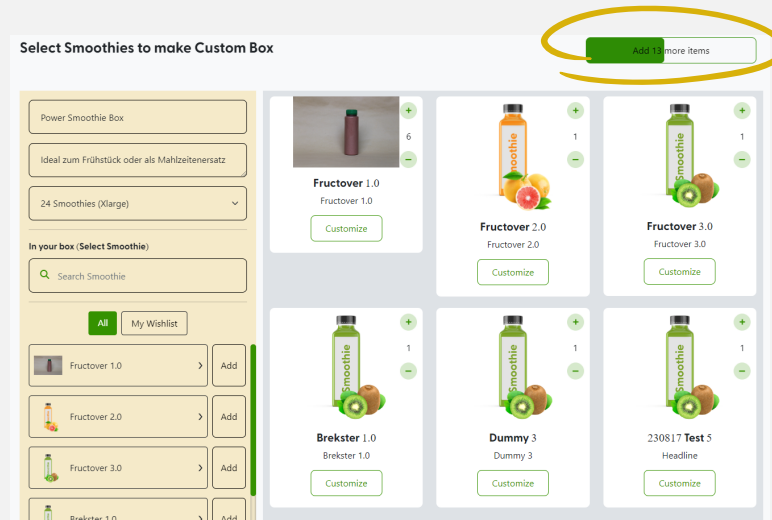

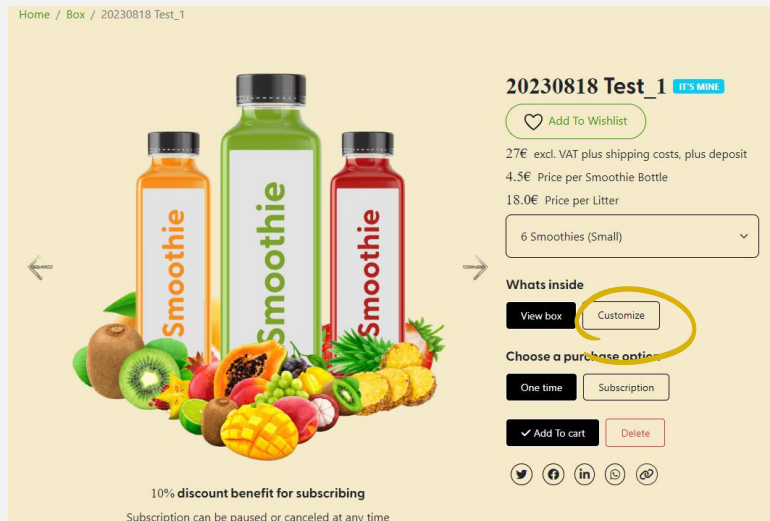

Recipes (latecomer) | 2/2

ToDo

1. Please change: If a saved custom smoothie becomes changed by the user (name of the smoothie or content/ingredients), save the “new” smoothie with a new smoothie ID
 - If no new ID would be given to the changed smoothie, the recipe would change in all places, e.g. in previous orders from the past, previous customized boxes, etc. - this would change the past and causes errors

Smoothie box (latecomer) | 1/1

ToDo

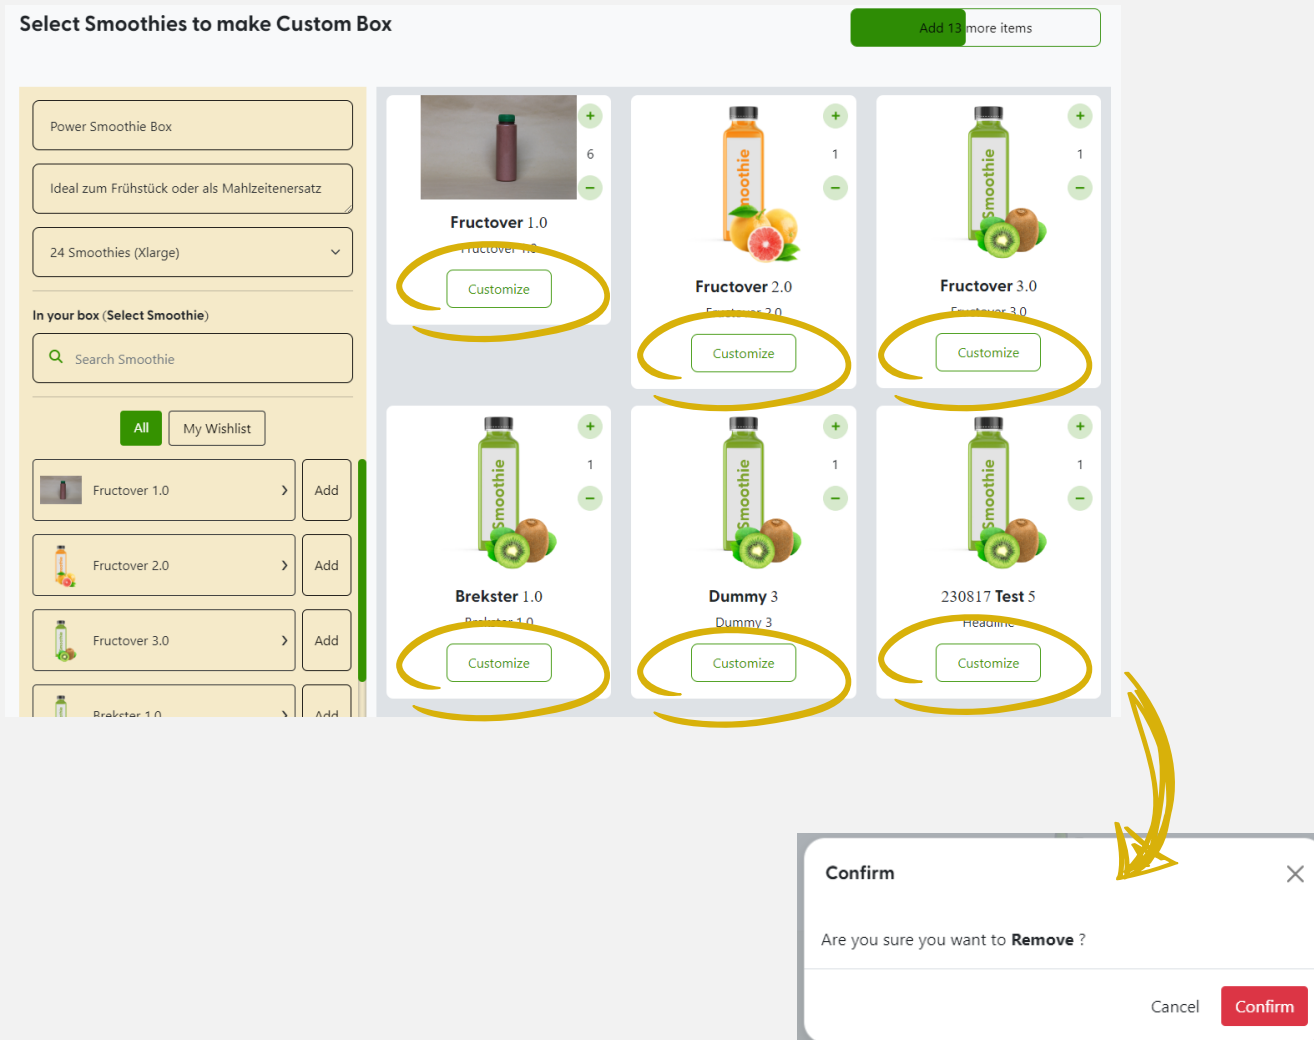

1. Please change: If a saved custom smoothie box becomes changed by the user (name of the box or content/smoothies), save the “new” box with a new box ID
 - If no new ID would be given to the changed box, the content would change in all places, e.g. in previous orders from the past, shared links, etc. - this would change the past and causes errors

Custom smoothie box (latecomer) | 1/1

Done

ToDo

1. Please add: We need a warning note, when a user clicks on “Customize”, he will leave the custom box page and loses the entered data.
 - We can add a warning note stating: “You are about to leave the box configurator. Your entered data might get lost.”

Order Summary

 **Athleten Smoothie Box x 1**
Ideal vor, während oder nach dem Sport zum Auffüllen der Energiespeicher 120 €

Discount Code

Apply

Subtotal 120.0 €

Deposit 1.5 €

Shipping Free Shipping

Total 121.5 €

ToDo Done

1. Please add: We need some text and an additional field, where customers can select an option for super early delivery (at extra cost) on the selected date:
 - The text should state: “Du bekommst deine Smoothies garantiert am gewählten Datum geliefert.”
 - A checkbox with the following text: “Für zusätzlich 1,95 € erfolgt die Zustellung bis 12:00 Uhr”
 - If the box is checked, the delivery cost raises by 1.95 €

Masking of order_ids in the - API endpoint and general display to users

We want to mask the order ids, so the customers and competition can not infer the amount of activity on the platform/shop.

Therefore, we would like the order ids to be hidden behind pre-generated strings, as well.

Shorter URL with
`/bestellung/<encoded_order_id>`

e.g.

<http://indivit.de/bestellung/CV6DYRQ0HOI4>

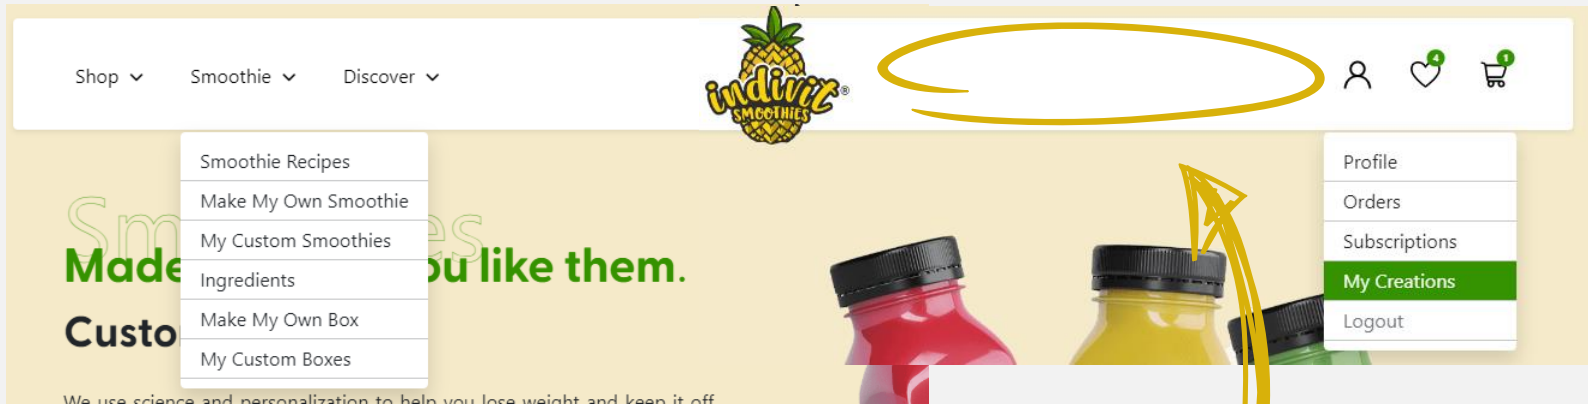

Should lead to the order page if the user has rights for showing it (being the ordering user or a admin).

Encoded strings will be pre-generated and provided by us.

This is how encoded order ids can/will look like:

```
INSERT INTO order_id_masks (VALUES
(CV6DYRQ0HOI4,0),
(T7EMY13NKGGS,1),

Landing page (latecomer) | 1/1

ToDo

1. Can we add a small timer within the top navigation, that states how much time a user has left to place his order before the next production cycle begins?
 - A text can state: “Wir beginnen die nächste Produktion von frischen Smoothies in:”
 - The timer can have the format as in the examples
 - The timer can be set and managed in the backend
